Forword by Yeva

The Earth is only a tiny cell within the body of the universe. There are billions of galaxies, each with billions of stars; we call our star - the Sun. One can only wonder what other names were given to the billions of suns out there. One wonders how many billions of planets support life, as we know it, or lives beyond our imagination.

"Where the suns shine there is life" - reads the inscription on a circular bronze object dated 1122 - 1236 BCE (Chou Dynasty). Even though time is the greatest enemy of history, from which a huge chunk is missing, still there is enough information to put the jig-saw puzzle together. The ancient scriptures of many cultures, the artifacts, the paintings, and prehistoric cave art provide an abundance of proof. What about the stories passed on from generation to generation of the ancient tribes? How on Earth did so called primitive people from the Dogon tribe know and worship for thousands of years the visitors from the distant star that was only "discovered" decades ago. All of the above and more open the pages of a book filled with overwhelming evidence, that the planet Earth was visited by super intelligent extraterrestrial races since the beginning of times. The ancients knew it, saw it, and some could even explain it, all those magical encounters, unbelievable technology, amazing and unfamiliar appearances of the visitors, beguiling those who witnessed, they saw a glorious mighty power and worshipped it. The god has arrived! The stories multiplied and changed with the speed of light. Some ancients worshipped the Sun - the life giver, it literally is. I wonder where from they got that accurate information?! Hmm.... It is a fact that the star started it all and sustained it for billions of years. We are all so different; the human people, the alien people, all of the animal and plant kingdom, the planets, the stars, the objects around us, all so different in appearance, yet, all made practically of the same. We are and everything else visible and invisible truly the stardust. We are one.

With all the information that is available, how ignorant it would be to think that the Earth is the only planet in the infinite universe that contains life. If it could happen here, it could and did happen on countless other planets, we just didn't find them yet. They found us instead.

Not so long ago the belief was, that Earth is the center of the universe, flat as a pancake supported by giant turtles. It is laughable now, but then, if anyone would try to question that ludicrous theory, one would die by the sadistic and brutal hand of the church. Millions forced to die in agony, in the fire of hate, ignorance and lie. Giordano Bruno (1548-1600), one of the most brilliant and progressive minds of his time, was one of the many to die for the truth. If only a few like Giordano were given a chance to live, think and speak out then... our world would most probably be a better place now.

The humans should learn from history, so not to repeat the same shameful mistakes, but do they?! Instead of creating wonders, the human mind is capable of, they savagely kill each other for money, oil, power, or land, which gets destroyed day by day, polluting the air, flattening the rain forests, contaminating the water etc... And after all this, they call themselves civilized. The human species have yet far to go to earn this title, and then maybe they will be ready for acceptance by an intergalactic community. Yes, the humans are still a primitive species, but one can't be too hard on

them, as they are only in their infancy; some only a few hours in life, some weeks or months, in a cosmic scale. The advanced ones don't get burned at the stake anymore, but they suffer for the truth, by being ridiculed and sometimes even silenced. Who knows how long it will take for the human species to face the truth, decades, centuries, millennia, that is, if they don't destroy one other in the mean time.

Maybe with ETs intervention the humans will learn how to live in harmony with each other and nature. After all, everything and everyone is interconnected in the universe. One day, when the humans are fully grown, they will reach the distant worlds and maybe even help some beginners of the cosmic family and become a contributing factor in their development, as we were helped once by our star cousins back in a distant past. Then we will become the gods, but for now the humans are still in their nappies. Well, one has to crawl before one walks, running and flying comes later, much later. Despite it all, look what the humans achieved in only the last 100 years and the possibilities lying ahead.

Imagine other civilizations which are thousand or even millions of years older than ours! What are they capable of? Growing artificial planets? Creating the atmosphere in a world where there's none? Defying gravity? Finding cosmic shortcuts and traveling from star to star which are light years apart? Living in peace???

So it's best to leave all these questions open and just wonder.

...And that is where this book takes you, the compendium to introduce the others, ET beings, those who came down and have gone, those who came down and stayed and those who are yet to come. This book offers a unique perspective to the wondering ones, those with an open mind, heart and soul.

INTRODUCTION

This book is the result of many years of search for answers.

This book intends to give an overview about all the different alien/extraterrestrial races which were and are in contact with the many civilizations on planet Earth. This is a huge collection which will be useful to every person who wants to know more about UFOs, alien visitors, celestial beings and much more. It is not intended to give the last truth. But it is a wonderful dictionary for each person who wants to know more. You can start searching; therein you will find many applicable internet addresses and important information about people who work in this fascinating field. You will have data about space beings from the Pleiades, Lyra, Tau Ceti, Andromeda, Sirius, Aldebaran, Betelgeuse, Venus, Mars, Arcturius and many many more. You will hear from extraterrestrial races like the Grey, Zetas, Arcturians, Pleadians, Sirians and about 200 more races.

Astronomers calculate that there exist at least 1,000,000,000 galaxies, each galaxy having an estimate of about 50,000,000,000 planets.

Over 10,000 UFO sightings are reported annually around the world.

About 200 extraterrestrial races are known to be in contact with Earth and millions of people have met or seen extraterrestrials.

The following list of races inhabiting this universe is by no means complete. The names given to the various groups are the names which are already in use to describe them. Names used herein are the most common ones.

Sometimes there are controversial statements, but today it isn't possible to check all of them if they are true or not.

This work gives a synopsis of what's going on and what was going on on planet Earth and in deep space.

These specifications are from experiencers, abductees, contactees and channelers from many different countries, like Australia, Brazil, Canada, France, Germany, Great Britain, Mexico, New Zealand, South Africa, Switzerland, United States and many more.

Our current understanding of the history of military UFO investigations is that they began in 1941 with the first crash recovery of a flying saucer in Cape Girardeau, Missouri. It is known that there exist many paintings from the Middle Ages with spaceships.

Perhaps some of you, dear readers, have insider knowledge that can serve to confirm or refute some of these claims. If so, then please share your data with the author of the book. Please contact the author in care of Trafford Publishing.

Critics are welcome and help to improve the quality of this dictionary. It is not intended to insult anybody or critic religion beliefs, but it is important not to exclude information.

1.2 Detailed Overview of Races in the Milky Way Galaxy

ABBENAKI	Inhabitants of Marduk.
ABERNACHE	Race from planet Maldek.
ADAM KADMON	Human looking race.
ADAMIC RACE	→ Jupiterians.
ADAMU	Earth humans created by the Elohim. Annunaki, Collective, Elohim.
AGHARIANS	→ Aghartians.
AGARTHIAN GIANTS	→ Agarthians.
AGHARTHANS	Many Agarthian Giants stay long periods and operate in Nibiru. Tamlris, YaPool. → Agartha. → Agartha Network.
AKONOWAI	Race of Sirians of the 3 rd planet of Sirius B.
ALCYONES	→ Alcyons.
ALCYONS	A genetically conglomerate race. Do not necessarily adhere to the non-intervention ethics of certain group in the Taygeta system. → Damsowzulvitz.
ALDEBARANS	Human militarists who are working with the Dracos and Greys. They have a large underground facility below Egypt, base of a secret Kamagol-II cult which has connection to the Bavarian Thule Society and the Montauk time-space projects.
ALIENS	Extraterrestrials have been visiting planet Earth since the beginning of time. They come from many different galaxies. About 95 % of all extraterrestrials are of a positive nature. One of the basic laws is the Law of Non-Interference. There are many types of extraterrestrials, some of them are from the Adamic Race (Adam Kadmon type), similar to Earth humans. There are about 200 known different extraterrestrial races that have been monitoring the Earth. The negative experiences seem to be from only 6 planets.

ALPHA DRACONIANS

Home of green and brown skinned, 7 to 8 ft tall Reptilian Humanoids.

Many of them have assimilated human DNA to enhance their emotional centers.

They are controlling a large number of other races by a massive computer network and sub-space transceiver that exists at some undisclosed location near their home system. It operates simultaneously on the 3rd and 4th dimension.

These Dracos are said to serve an elite class of Reptilians, the White Dracos (Beige Dracos) and dark-skinned winged Dracos called Ciakars. Were the first race to have space travel in our galaxy, for 4 billion years.

They believe that this universe was here for them.

A reptilian race composed of master geneticists.

Created the primate race, which was first brought to Mars and then to Earth.

The primate race was then tinkered with by many other different races (21).

The primate race became Homo Sapiens.

We used to have 12 strands of DNA, 10 strands were taken out by a group from Orion in order to control us.

→ Ciakars.

ALTAIRIANS

Alleged reptilian inhabitants of the Altair system in the Aquila constellation.

They collaborate with Nordic humans, Greys and Earth military presence.

Headquarters of the "Corporate", which maintains ties with the Ashtar and Draconian Collectives.

Humanoids: There are 2 variants:

>> Nordic looking,

>> Semitic looking

Landed at Holloman AFB, New Mexico in the 1960's.

→ Anon Sa Ra.
